

Bytewise Fellowship

Deep Learning

Task #1 & Task #2

Submitted by:
Muid Bin Aslam

Git and GitHub

Objectives:

To familiarize ourselves with the workings of Git and GitHub.

Tools Used:

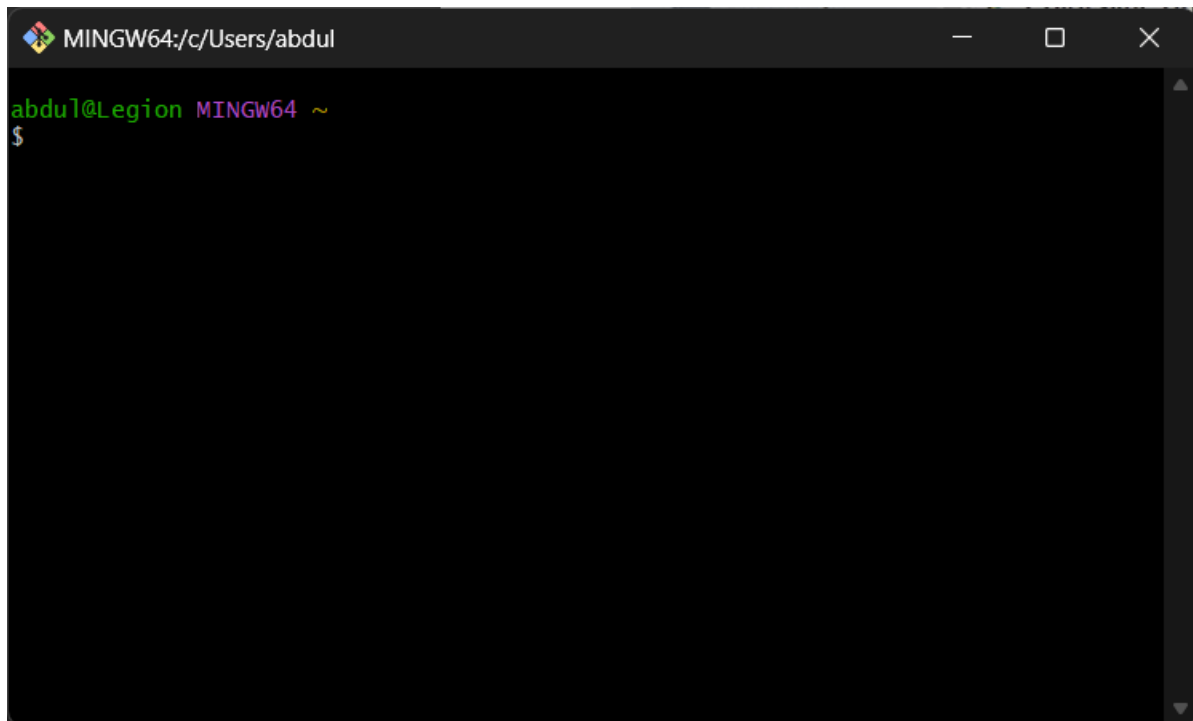

Git Bash, GitHub.

Submission Date: 16th March, 2023

Task #1:

From the provided source cover and practice the topics/content before Remote Repositories in Content Outline.

Directions: *Please take screenshots of the practice you will do from the given topics and submit those with your name.*

A screenshot of a MINGW64 terminal window. The title bar at the top reads "MINGW64:/c/Users/abdul" and includes standard window control buttons (minimize, maximize, close). The terminal content shows a green prompt "abdu1@Legion" followed by "MINGW64 ~" and a white dollar sign "\$" on the next line, indicating a ready state for input. The background is black, and the text is green and white.

Task #2:

After learning about Remote Repos do the following:

- 1). Create your GitHub account if don't have any yet.*
- 2). Create a repository named "Deep-Learning-BWF-Your name"*
- 3). Push your screenshots of work or word/pdf files you made of practice work to the repo.*
